21	Spare mic		SM58 from venue	High		FX 3	In case of emergency(15m cable)	Venue
TB	Talkback line	Audiotech	Own SM58	One line back to 19 inch rack for talkback from FOH to stage (Aux)				Audiotech

Format FX			
FX 1 = Vocal Plate	FX 2 = Tap Delay	FX 3 = Vocal Plate	FX 4 = Snare Plate

Stageplan **Ghost Division**

Extra remarks:

Standard we play without any amplifier. If needed, we can bring our amps. But it will only done on request. We need a Talkback line at the FOH. It will be patched on our monitorrack(for communication with band) We will bring an own mic for it.

Lights: When we bring our own light technician, he will contact you himself.

Special FX: We bring our own gear(2x Sparkular and 4x upright smoke), operation is also done by us. Therefore we need power on Frontstage! Therefore we need 2 completely free current groups 16A!

Backdrop: We bring our own backdrop, This is 4.25 m wide and 3 m high. The backdrop is very essential in our stage image!

Monitoring: (Provide by us)

We provide our own rack with in-ear monitoring. All instrument(exclusive drums) need to go first to our rack. There it will be splitted to FOH. We provide our outputs with a multisnake(XLR) to FOH/Stagebox of the venue.

All the in-ears are wireless and within the frequency range 823-832MHz and 863-865 MHz.

FOH: (Provide by Venue)

System: a stereo full-range system with sufficient power for a metal show in the venue. Taking into account the number of expected visitors.

Desk: 32 channel mixing console(Preferable digital) Digico/Soundcraft/Allen&Heath/Yamaha/Midas.

If it is analogue; 4x parametric eq and 4 aux-sends per channel.

Additional: We require at least 1 technician with total knowledge of the sound equipment present in the venue.

Power: (Provide by Venue)

We need 3 completely free current groups (16A, separately secured). One group for the Backline and the other for the Special FX.
